	<i>Liquid Intake Acidizing Additive for Birds</i>	Review: 01 Date: Nov-24-2020

ABOUT THE WORD KENSUI®

Did you know that there are ten words for rain in Japan? The relationship between water, weather and the seasons are part of Eastern traditions. After all, it is the main inductor of life, it was our inspiration to develop Kensui® - a protective liquid of the bird herd inducing the health and the alimentary use of its creation.

DESCRIPTION

Kensui® Birds is an acidizing additive, used in liquid intake for birds, by drinking water. The **Kensui® Birds** technology is safe, easy to use and economical. It produces improvement results associated with various quality parameters, making it more efficient.

BRAND

Kensui® Birds, liquid intake acidizing additive for birds.

COMPOSITION

Acetic acid, lactic acid, butyric acid and qsp water.

GUARANTEES

Acetic acid: 0.84 g/Liter
lactic acid: 4.5 g/Liter

PRESENTATION

Fluid, brown “homogeneous suspension”.

Product specifications are on the label printed on the bucket.

INDICATION OF USE

The **Kensui® Birds**, is used to promote the reduction of the pH of drinking water, to benefit the digestive metabolism of production animals and to obtain an improvement in the zootechnical performance.

WAYS OF APPLICATION

Species	Inclusion (drinking water)	Package
Broiler chickens and laying hens	100 - 300 mL/100 liters of water	Pumps 20 L Gallons 5 L Bottle 1 L

For dosage adjustment or further information regarding quantity and forms of application, please contact our technical team.

STORAGE CONDITIONS

The storage must be in a ventilated, dry place and protected from direct light.

PRECAUTIONS

Avoid contact with eyes, skin and clothes.
