	Todo Ano (All year) Evergreen Nebuka Scallion	Issue: Dec-04-2020
	Organic Seed	Review: 00 Date: 00/00/2020

DESCRIPTION

Todo Ano (All year) Evergreen - Nebuka scallion seed produced under the Nature Farming system, certified as organic by the Biodynamic Certifications (IBD Certificações) and free of chemical treatment. It is a medium green colored leaf cultivar. It presents good tilling capacity, soft and pleasant flavor.

BRAND

Todo Ano (All year) Evergreen – Nebuka scallion seed, Nature Farming seed line.

COMPOSITION

Scallion seed.

PRESENTATION

Naked seed, untreated.

PACKAGES

0.1 g: primary sachet packaging, in aluminum, sealed, containing 0.05 g of seeds. Secondary packaging, 97x125 mm printed on Couchet Glow 150 g paper. 4x0 colors and finishing with glossy plasticization, application of double-sided tape and hole in the upper part to hang on display. Identification, stamps and information are printed on the secondary packaging and additional information (quantity, lot number, year of harvest, category, warranty, expiration date and barcode) on adhesive label fixed on the back of the packaging.

4 g: primary sachet packaging, in aluminum, sealed, containing 3 g of seed. Secondary packaging, 97x125 mm printed on Couchet Glow 150 g paper. 4x0 colors and finishing with glossy plasticization, application of double-sided tape and hole in the upper part to hang on display. Identification, stamps and information are printed on the secondary packaging and additional information (quantity, lot number, year of harvest, category, warranty, expiration date and barcode) on adhesive label fixed on the back of the packaging.

Harvest: started at 60 days after sowing, in summer, and 90 days in winter. It doesn't need the plant to be totally harvested, cut the leaves that you will use.

CARING

Planting season: all year. Irrigation of the seedling: once a day, without letting it soak. Irrigation of the plant: 1 to 2 times a day, so that the soil remains moist, without soaking. Lighting: direct sunlight, at least 4 hours a day. Location: airy and protected from strong winds. Soil maintenance: protect with a layer of grass or dry leaves to maintain optimal temperature and humidity.

*Substrate: material where plants will fix their roots to absorb water and nutrients. It can be a pure vegetal soil, or of good origin, or a mixture of sieved soil (70%) with alternative substrates (30%).

WARRANTY AND VALIDITY

According to the Ministry of Agriculture, Livestock and Supply (MAPA), the minimum guarantee of lettuce seeds for commercialization is 95% purity and 60% germination. Germination and purity achieved in the official germination test are assured on the packaging. The validity of the test is 2 years from the date of the first official analysis and another 2 years from the date of each revalidation of the germination test. The revalidation can occur indefinitely, while the lot is reaching the minimum germination standard, mentioned above.

STORAGE CONDITIONS

Keep the seeds in their original packaging, inviolate, in cool places, without exposure to the sun.

REGISTRATION

Cultivar registered in the National Register of Cultivars (RNC) of the Ministry of Agriculture, Livestock and Supply (MAPA) under number 03.610.

OTHERS

Keep at the disposal of the inspection agency the invoice and copy of the seed document

(by lot).
