		<b>Issue: Dec-04-2020</b>
		<b>Review: 00</b> <b>Date: 00/00/2020</b>

## DESCRIPTION

Verdão coriander seed produced under the Nature Farming system, certified as organic by the Biodynamic Certifications (IBD Certificações) and free of chemical treatment. The characteristics of the cultivar are smooth and tall leaves, dark green in color. Cultivar with rustic plant, good adaptation to organic agriculture, early harvest, good productivity and great formation of packs. Good adaptation to high temperatures and resistance to *Meloydogine incognita* breed 3, *M. javanica* and *M. enterolobii*.

## BRAND

Verdão coriander seed, Nature Farming seed line.

## COMPOSITION

Coriander seed.

## PRESENTATION

Naked seed, untreated.

## PACKAGES

**0.5 g:** primary sachet packaging, in aluminum, sealed, containing 0.5 g of seeds. Secondary packaging, 97x125 mm printed on Couchet Glow 150 g paper. 4x0 colors and finishing with glossy plasticization, application of double-sided tape and hole in the upper part to hang on display. Identification, stamps and information are printed on the secondary packaging and additional information (quantity, lot number, year of harvest, category, warranty, expiration date and barcode) on adhesive label fixed on the back of the packaging.

**15 g:** pouch type package with zipper, in aluminum, 10 cm x 17.5 cm, sealed, containing 15 g of seed. Identification, stamps and additional information (quantity, lot number, year of harvest, category, warranty, expiration date and barcode) on adhesive label attached to the front of the package.

## PLANTING RECOMMENDATIONS

**Planting on beds:** prepare the beds and repeat the planting in spaces of 10 cm between plants and 30 cm between rows of plants.

**Planting in vase (with holes):** fill the bottom with a layer of stones and complete it with the substrate\*. Drill a hole 1 cm deep and insert 2 to 3 seeds.

**Note:** the seeds germinate between 7 and 21 days. When the seedlings are 5 cm high, choose the most vigorous and discard the others.

**Harvest:** started after 35 days of sowing. It doesn't need the plant to be totally harvested, remove the leaves whatever you will use.

## CARING

**Planting season:** all year. Irrigation of the seedling: once a day, without letting it soak. Irrigation of the plant: 1 to 2 times a day, so that the soil remains moist, without soaking. Brightness: direct sunlight, at least 4 hours a day. Location: airy and protected from strong winds. Soil maintenance: protect with a layer of grass or dry leaves to maintain optimal temperature and humidity.

\*Substrate: material where plants will fix their roots to absorb water and nutrients. It can be a pure vegetal soil, or of good origin, or a mixture of sieved soil (70%) with alternative substrates (30%).

## WARRANTY AND VALIDITY

According to the Ministry of Agriculture, Livestock and Supply (MAPA), the minimum guarantee of lettuce seeds for commercialization is 95% purity and 60% germination. Germination and purity achieved in the official germination test are assured on the packaging. The validity of the test is 2 years from the date of the first official analysis and another 2 years from the date of each revalidation of the germination test. The revalidation can occur indefinitely, while the lot is reaching the minimum germination standard, mentioned above.

## STORAGE CONDITIONS

Keep the seeds in their original packaging, inviolate, in cool places, without exposure to the sun.

## **REGISTRATION**

Cultivar registered in the National Register of Cultivars (RNC) of the Ministry of Agriculture, Livestock and Supply (MAPA) under number 05.216.

## **OTHERS**

Keep at the disposal of the inspection agency the invoice and copy of the seed document (by lot).

## **DISTRIBUTED EXCLUSIVELY BY:**
